

Michael Jahn

Curriculum vitae

Personal information

Name Dr. rer. nat. Michael Jahn
Date of birth Dec 31, 1985
Born in Dresden, Germany
Address Skogsbacken 20, 17241 Sundbyberg, Sweden
Mobile phone +46 76 7812578
Email michael.jahn@scilifelab.se

Current position

Post-doctoral fellow, group of Prof. Paul Hudson, Science For Life Laboratory, Stockholm. Topic: Systems biology and metabolic engineering of photoautotrophic bacteria.

Education

July 10, 2015 **Graduated *Doctor rerum naturalium***, at the University of Leipzig, Germany, with *summa cum laude* (1.0).
2011–2015 **PhD studies**, Group of Prof. Susann Müller, Dept. Environmental Microbiology, Helmholtz-Centre for Environmental Research, Leipzig.
Thesis: 'Characterization of population heterogeneity in a model biotechnological process using *Pseudomonas putida*'.
2005–2011 **Diploma studies, biology**, Dresden University of Technology (TUD), main subjects: genetics, biochemistry, immunology.
Diploma thesis: 'Dynamic mating pheromone gradients for induction of mating projection and fluorescence in yeast', group of Prof. Gerhard Rödel, grade 1.2.
1996–2004 **High school**, Romain-Rolland-Gymnasium, Dresden, Abitur with grade 1.6.
1992–1996 **Elementary school**, Dresden.

Work experience

- 5/2016–now **Post-doctoral researcher**, Systems biology analysis of cyanobacteria at the group of Prof. Paul Hudson, Science For Life Laboratory, Stockholm (belongs to KTH).
- 8–12/2009 **Erasmus internship**, Center of Excellence in Evolutionary Genetics and Physiology at the group of Prof. Mikko Nikinmaa, Dept. of Biology, University of Turku, Finland.
- 2008–2009 **Student assistant**, Institute of Genetics, group of Prof. Gerhard Rödel, Dept. of Biology, Dresden University of Technology (TUD).
- 2007–2008 **Student assistant**, Mitteldeutscher Praxisverbund Humangenetik, Dresden.
- 2004–2005 **Voluntary service 'Freiwilliges Ökologisches Jahr'**, national park 'Sächsische Schweiz', tour guide and education.

Leaves

- 11/2019–3/2020 Parental leave with 2nd child Sophie
- 9/2015–4/2016 Parental leave with 1st child Simon

Awards

- Nov 25, 2015 **PhD-Award** 2015 by the Helmholtz-Centre for Environmental Research, Leipzig. Awarded annually for excellence of the dissertation, prize money 1,000 Euro.

Awarded grants

- Nov 11, 2019 **Investigation of protein resource allocation in the model CO₂ fixing bacterium *Ralstonia eutropha*** (Swedish: Undersökning av proteiners resursfördelning i en modell för CO₂-fixerande bakterier, *Ralstonia eutropha*).
Funding agency: FORMAS. Project number: 2019-01491. Project leader: Dr. Michael Jahn. Awarded funding for period 2020-01-01-2021-12-31. Total funds: 2,000,000 SEK (200,000 Euro).

Teaching and supervision

- Teaching Planned teaching activity for the **course CB2030 'Systems biology'** at Kungliga Tekniska Högskolan (KTH, together with Prof. Lukas Käll), study period winter 2019 – spring 2020. Teaching activity was unfortunately postponed due to parental leave and COVID-19 outbreak. It is intended to resume teaching activity as soon as possible. Topics covered for this course among others: Pathway Analysis, Genome-scale metabolic models, Flux Balance Analysis.
- Introductory course on the programming language R and its application for the analysis of flow cytometry data at the Helmholtz Centre for Environmental Research, Leipzig, 2015.
- Member of the PhD council and the Environmental Board of the Helmholtz Centre for Environmental Research, Leipzig, 2011-2015. Among other tasks providing guidance for starting PhD students.

Supervision Supervised several master and intern students during my PhD and postdoctoral studies:

- Alexander Mattausch, intern biotechnology, University of Heidelberg, 2019
- Timothy Bergmann, master student biotechnology (KTH, Stockholm), 2019
- Raquel Perruca, master student, Lund Technical University, 2018
- Carsten Vorpahl, master student University of Leipzig, 2015
- Dominique Türkowsky, master student University of Leipzig, 2014

Scientific interests and expertise

Sustainability	Current overuse of (fossil) planetary resources and disposal of non-degradable waste into the environment makes the shift towards a sustainable economy mandatory. The concept of the bioeconomy entails that conventional chemical processes or materials be replaced with sustainable ones. Autotrophic microbes can play their roll as a versatile, efficient and biodegradable catalyst.
Metabolic modeling, data science and visualization	High-throughput methods generate larger amounts of biological data than ever before. This poses problems, but also opportunities. I envision a close integration of experiments and data with predictive mathematical models , such as genome scale metabolic models. This allows to integrate the current state of knowledge into a coherent system, detect contradictions, and identify overarching themes in metabolism.
Metabolic engineering	Microbial cells are 'programmed' for production of biomass, not fine chemicals. Rational design and engineering of pathways is necessary to turn photoautotrophic bacteria into 'solar power plants'.
Proteomics & other 'omics	Proteomics, transcriptomics and metabolomics are probing the whole cell instead of isolated parts. This allows to discover biological relationships that were not considered in the original hypothesis, and gives an unbiased picture.
Single cell variability	Previous work regarding single cell variability of <i>S. cerevisiae</i> , <i>E. coli</i> , and <i>Pseudomonas putida</i> showed me that a population is never uniform but varies extensively in size, shape, productivity, and plasmid copy number. Future projects aiming to build improved cellular catalysts have to consider this variability.
Reproducibility and Transparency	Adopting open standards, sharing protocols and resources , and depositing data and apps on publicly available sites has great advantages. It increases reach, trust of the scientific community, and reproducibility of results.

Qualifications and skills

Courses	Approved project manager for genetic works, according to German laws (§ 14,15 GenTSV), 2015. Laser scanning microscopy, 1 week course, 2013. Scientific writing and project proposal writing, 2 week course , 2013.
Model organisms	Cultivation and molecular biology of cyanobacteria (e.g. <i>Synechocystis sp.</i> , <i>Synechococcus</i>), <i>Cupriavidus necator</i> , <i>Pseudomonas putida</i> , <i>E. coli</i>

Important techniques	Bioreactor cultivation, chemostat, turbidostat Mass spectrometry, proteomics Flow cytometry, cell sorting, automated imaging Data analysis and visualization Molecular biology work (DNA and protein extraction, cloning)
Programming languages	R (advanced), Python (moderate)
Authored R packages	SysbioTreemaps – visualizing gene expression with treemaps ShinyMC – interactive app to monitor bioreactor cultivations ShinyProt – interactive app to visualize proteomics data ShinyLib – interactive app to visualize gene knockout library data
Metabolic models	Improved <i>Synechocystis</i> coarse grained (simplified) resource allocation model, for GAMS, and ported to python. Improved and updated genome scale model (GEM) for <i>Cupriavidus necator</i> a.k.a. <i>Ralstonia eutropha</i> . Constructed new genome scale resource balance (RBA) model for <i>Cupriavidus necator</i> a.k.a. <i>Ralstonia eutropha</i>

Peer review and outreach

Peer review	Active reviewer for several journals including Microbial Cell Factories, Frontiers in Microbiology, Photosynthesis Research, and others. The full list of my review contributions is available via Publons.org
Platforms	My home page ↗ My github page ↗ My ORCID page ↗ My Publons page ↗ My ResearchGate page ↗ My Twitter page ↗

Conference contributions

- May 22–24, 2019 **NPC 14** - Nordic congress on photosynthesis, Turku, Finland. Short oral presentation.
- Oct 24–26, 2018 **4th Applied Synthetic Biology meeting** - Toulouse, France. Oral presentation.
- Jul 20–22, 2015 **Single Cell VI** – 6th International Conference on Analysis of Microbial Cells at the Single Cell Level, Retz (Austria). Oral presentation.
- Oct 15–17, 2014 **DGFZ** – 24th Annual Conference of the German Society for Cytometry, Dresden. Oral presentation.
- Jul 13–16, 2014 **ECB16** – 16th European Congress on Biotechnology, Edinburgh. Oral presentation.
- May 26–28, 2014 **DECHEMA** – Biomaterials Made in Bioreactors, Dresden. Poster.
- Mar 06–08, 2013 **RPP7** – 7th European Conference on Recombinant Protein Production, Ulm. Oral presentation.
- Jul 21–25, 2013 **FEMS** – 5th Congress of European Microbiologists, Leipzig. Poster.
- Oct 10–12, 2012 **DGFZ** – 22nd Annual Conference of the German Society for Cytometry, Bonn. Oral presentation.
- Jun 23–27, 2012 **CYTO 2012** – 27th Congress of the International Society for Advancement of Cytometry, Leipzig. Oral presentation.
