

# Michael Jahn

## Curriculum vitae

### Personal information

Name Dr. rer. nat. Michael Jahn  
Date of birth Dec 31, 1985  
Born in Dresden, Germany  
Address Bokvägen 13, 16933 Solna, Sweden  
Mobile phone +46 76 7812578  
Email michael.jahn@scilifelab.se

### Current position

**Post-doctoral fellow**, group of Prof Paul Hudson, Science For Life Laboratory, Stockholm. Topic: Systems biology and metabolic engineering of photoautotrophic bacteria.

### Education

- July 10, 2015 **Graduated *Doctor rerum naturalium***, at the University of Leipzig, Germany, with *summa cum laude* (1.0).
- 2011–2015 **PhD studies**, Group of Prof Susann Müller, Dept. Environmental Microbiology, Helmholtz-Centre for Environmental Research, Leipzig.  
Thesis: 'Characterization of population heterogeneity in a model biotechnological process using *Pseudomonas putida*'.
- 2005–2011 **Diploma studies, biology**, Dresden University of Technology (TUD), main subjects: genetics, biochemistry, immunology.  
Diploma thesis: 'Dynamic mating pheromone gradients for induction of mating projection and fluorescence in yeast', group of Prof Gerhard Rödel, grade 1.2.
- 1996–2004 **High school**, Romain-Rolland-Gymnasium, Dresden, Abitur with grade 1.6.
- 1992–1996 **Elementary school**, Dresden.

Bokvägen 13 – 16933 Solna, Sweden

## Work experience

- 5/2016–now **Post-doctoral researcher**, Systems biology analysis of cyanobacteria at the group of Prof Paul Hudson, Science For Life Laboratory, Stockholm (belongs to KTH).
- 8–12/2009 **Erasmus internship**, Center of Excellence in Evolutionary Genetics and Physiology at the group of Prof Mikko Nikinmaa, Dept. of Biology, University of Turku, Finland.
- 2008–2009 **Student assistant**, Institute of Genetics, group of Prof Gerhard Rödel, Dept. of Biology, Dresden University of Technology (TUD).
- 2007–2008 **Student assistant**, Mitteldeutscher Praxisverbund Humangenetik, Dresden.
- 2004–2005 **Voluntary service 'Freiwilliges Ökologisches Jahr'**, national park 'Sächsische Schweiz', tour guide and education.

## Leaves

- 11/2019–3/2020 Parental leave with 2<sup>nd</sup> child Sophie
- 9/2015–4/2016 Parental leave with 1<sup>st</sup> child Simon

## Awards

- Nov 25, 2015 **PhD-Award 2015** by the Helmholtz-Centre for Environmental Research, Leipzig. Awarded annually for excellence of the dissertation, prize money 1,000 Euro.

## Awarded grants

- Nov 11, 2019 **Investigation of protein resource allocation in the model CO<sub>2</sub> fixing bacterium *Ralstonia eutropha*** (Swedish: Undersökning av proteiners resursfördelning i en modell för CO<sub>2</sub>-fixerande bakterier, *Ralstonia eutropha*).  
Funding agency: FORMAS. Project number: 2019-01491. Project leader: Dr. Michael Jahn. Awarded funding for period 2020-01-01-2021-12-31. Total funds: 2,000,000 SEK (200,000 Euro).

## Grant proposals

- Jan 26, 2016 **Development of single cell screening tools to optimize N-glycosylation efficiency in *Saccharomyces cerevisiae*** (German: Entwicklung von Einzelzell-Analyseverfahren zur Optimierung der N-Glykosylierung in *Saccharomyces cerevisiae*).  
Funding agency: Deutsche Forschungsgemeinschaft (DFG). Research Fellowship, two year funding period. Project number: JA 2529/1-1. Positively evaluated but turned down due to competing job offer.
- Jun, 2015 **Analysis of plasmid and chromosomal copy number variation in heterotrophic bacteria**. Co-author/mentor for PhD research proposal.  
Funding agency: Deutsche Bundesstiftung Umwelt (DBU). Declined in second stage of evaluation.

## Teaching and supervision

Teaching	<p><b>lecture for course KE2130 'Renewable fuels'</b>, at KTH Stockholm. Winter semester 2020/2021. Topics: Metabolic engineering, whole cell biocatalysts, genome-scale models, flux balance analysis.</p> <p><b>lecture for course CB2030 'Systems biology'</b>, at KTH Stockholm. Winter semester 2019/2020, <i>postponed</i> due to parental leave.</p> <p><b>lecture for course introduction to the programming language R</b> and its application for flow cytometry data, at the Helmholtz Centre for Environmental Research, Leipzig, 2015.</p>
PhD council	Member of the PhD council and the Environmental Board of the Helmholtz Centre for Environmental Research, Leipzig, 2011-2015. Tasks: providing guidance for starting PhD students, organizing retreats and other student events.
Supervision	<p>Supervised master and intern students during my PhD and postdoctoral studies:</p> <ul style="list-style-type: none"><li>○ Alexander Mattausch, intern biotechnology, University of Heidelberg, 2019</li><li>○ Timothy Bergmann, master student biotechnology (KTH, Stockholm), 2019</li><li>○ Raquel Perruca, master student, Lund Technical University, 2018</li><li>○ Carsten Vorpahl, master student University of Leipzig, 2015</li><li>○ Dominique Türkowsky, master student University of Leipzig, 2014</li></ul>

## Scientific interests and expertise

Sustainability	Overuse of (fossil) planetary resources and disposal of non-degradable waste into the environment makes the shift towards a sustainable economy mandatory. Synthetic biology can pave the way for a more sustainable circular economy.
Metabolic modeling, data science	High-throughput methods generate larger amounts of biological data than ever before. This poses problems, but also opportunities. I strive for a close integration of experiments and data with <b>predictive mathematical models</b> , such as genome scale metabolic models.
Metabolic engineering	Microbial cells are 'programmed' for production of biomass, not fine chemicals. <b>Rational design and engineering of pathways</b> is necessary to turn autotrophic bacteria into microbial cell factories.
Proteomics & other 'omics	Proteomics, transcriptomics and metabolomics are probing the whole cell instead of isolated parts. This allows to discover biological relationships that were not considered in the original hypothesis, and gives an unbiased picture.
Single cell variability	Previous work regarding <b>single cell variability</b> of <i>S. cerevisiae</i> , <i>E. coli</i> , and <i>Pseudomonas putida</i> showed me that a population is never uniform but varies extensively in size, shape, productivity, genetic inventory. Single cell variability must be considered in microbial research.
Reproducibility and Transparency	Adopting <b>open standards, sharing protocols and resources</b> , and depositing data and apps on publicly available sites has great advantages. It increases reach, trust of the scientific community, and reproducibility of results.

## Qualifications and skills

Courses (selection)	Approved project manager for genetic works, according to German laws (§ 14,15 GenTSV), 2015. Laser scanning microscopy, 1 week course, 2013. Scientific writing and project proposal writing, 2 week course, 2013.
Model organisms	Cultivation and molecular biology of cyanobacteria (e.g. <i>Synechocystis</i> sp.), <i>Cupriavidus necator</i> , <i>Pseudomonas putida</i> , <i>E. coli</i>
Techniques	Bioreactor cultivation, chemostat, turbidostat Mass spectrometry, proteomics Flow cytometry, cell sorting, automated imaging Data analysis and visualization Molecular biology, cloning
Programming languages	R (advanced), Python (moderate)
Authored R packages	SysbioTreemaps – visualizing gene expression with treemaps Lattice-tools – panel functions to extend R lattice ShinyMC – interactive app to monitor bioreactor cultivations ShinyProt – interactive app to visualize proteomics data ShinyLib – interactive app to visualize gene knockout library data
Metabolic models	<i>Synechocystis</i> resource allocation model, for GAMS, and ported to python. Genome scale metabolic model (GEM) for <i>Cupriavidus necator</i> a.k.a. <i>Ralstonia eutropha</i> . Genome scale resource balance analysis (RBA) model for <i>Cupriavidus necator</i> a.k.a. <i>Ralstonia eutropha</i>

## Peer review and outreach

Peer review	Active reviewer for several journals including Microbial Cell Factories, Frontiers in Microbiology, Photosynthesis Research, and others. The full list of my review contributions is available on Publons.org↗.
Outreach	All software and computational pipelines available on github.com↗. Research presented to the public via my home page↗, ResearchGate↗, and Twitter↗.
Platforms	My home page↗ My github page↗ My ORCID page↗ My Publons page↗ My ResearchGate page↗ My Twitter page↗

## Languages

German	<b>Native language.</b>
English	<b>Proficient user</b> , CEF level C1.
Swedish	<b>Vantage user</b> , CEF level B2.

## Conference contributions

- Sep 07–09, 2020 **11EWBC** - 11th European workshop on the biology of cyanobacteria, Porto, Portugal (changed to virtual format). Oral presentation.
- May 22–24, 2019 **NPC 14** - Nordic congress on photosynthesis, Turku, Finland. Short oral presentation.
- Oct 24–26, 2018 **4th Applied Synthetic Biology meeting** - Toulouse, France. Oral presentation.
- Jul 20–22, 2015 **Single Cell VI** – 6<sup>th</sup> International Conference on Analysis of Microbial Cells at the Single Cell Level, Retz (Austria). Oral presentation.
- Oct 15–17, 2014 **DGFZ** – 24<sup>th</sup> Annual Conference of the German Society for Cytometry, Dresden. Oral presentation.
- Jul 13–16, 2014 **ECB16** – 16<sup>th</sup> European Congress on Biotechnology, Edinburgh. Oral presentation.
- May 26–28, 2014 **DECHEMA** – Biomaterials Made in Bioreactors, Dresden. Poster.
- Mar 06–08, 2013 **RPP7** – 7<sup>th</sup> European Conference on Recombinant Protein Production, Ulm. Oral presentation.
- Jul 21–25, 2013 **FEMS** – 5<sup>th</sup> Congress of European Microbiologists, Leipzig. Poster.
- Oct 10–12, 2012 **DGFZ** – 22<sup>nd</sup> Annual Conference of the German Society for Cytometry, Bonn. Oral presentation.
- Jun 23–27, 2012 **CYTO 2012** – 27<sup>th</sup> Congress of the International Society for Advancement of Cytometry, Leipzig. Oral presentation.
